

Understanding the Early Development of Cerebral Palsy

Research Study

What's this study about?

We want to understand how different aspects of development such as movement and communication develop in babies who have cerebral palsy (CP) or are at high risk of CP.

Why get involved?

- Participation in this study will give you regular and thorough assessment information to better plan therapy for your child.
- Your participation will help to achieve significant advances in understanding the early development of CP.

Do you:

- Have a baby who is under 12 months of age corrected for prematurity who has a diagnosis of CP or at risk of CP?
- Live in New South Wales?
