Early Comms Study

Is it ever “too early”, to provide communication intervention for young children?

Who may be eligible?

- Children under 12 months old;
- Children with cerebral palsy (CP), or at high risk of CP; and
- Live in Sydney, Central Coast, Newcastle, Hunter or Wollongong regions

Participation in this study involves:

- Communication assessments; and
- Communication intervention, following It Takes Two to Talk® - The Hanen Program®, including:
 - **8 x small group parent training sessions (either centre-based or online)**
 - **4 x individual home visits, with you and your child**

“

What are parents saying about 'It Takes Two to Talk'?

- “It is a big commitment in terms of time, but soon becomes part of your life. You don’t sit down and ‘do Hanen’; you incorporate it into everyday life. It changed everything.”
- “The It Takes Two to Talk Program has given life a whole new meaning—it’s brighter, happier, less confusing/frustrating. We have learned new and wonderful ways to communicate with our daughter and she with us.”
