

# YOU CAN HELP WITH OUR RESEARCH!

BE A VOICE TO HELP CREATE BETTER WAYS FOR KIDS WITH CEREBRAL PALSY (CP) TO TELL US WHEN THEY ARE IN PAIN!

This study has been approved by the University of South Australia Human Research Ethics Committee protocol number: 204997

## Why do you need help?

At the moment it can be tricky for children with CP and **complex communication needs (CCN)** to tell others when they are in pain.

We want to change this with the help of other kids with and without CP and CCN!

## How will you help?

Your child will get access to 2 online workbooks with follow up interviews to brainstorm:

- Their **experiences and ideas** to make it easier for other kids to better self-report their pain!
- What **words/symbols/strategies** they would like to use, and
- **Co-create new drawings/images** alongside artists for future communication devices!

## WHO CAN PARTICIPATE?

We are seeking children/teens between the ages of 10-16 years who:

- Are diagnosed with CP, who also live with CCN,
- Are diagnosed with CP without CCN, and
- Live with chronic pain, but do not have CP or CCN
