

# International guidelines for neuropsychological assessment of people with cerebral palsy: the CPASSES and EASED-CP projects

## WHAT ARE CPASSES AND EASED-CP?

**Cognitive assessment** and diagnosing **Autism Spectrum Disorder (ASD)** can be difficult in people who live with motor limitations. These projects aim to improve how cognitive functioning and ASD core diagnostic features are assessed in people living with cerebral palsy (CP).

## WHAT ARE THE PROJECT'S STEPS?

## WHY IS YOUR PARTICIPATION IN THIS SURVEY IMPORTANT?

Research literature might not represent all clinical practices, important qualitative information, nor personal insights of people living with CP or their families. We invite people living with CP, their families, and experts in the field to provide their opinion about this topic by completing an **online survey**.

### PEOPLE LIVING WITH CP OR THEIR FAMILIES

If you wish, we will acknowledge your participation in the dissemination of the results!

## Thank you for your participation!

Please **share** this flyer with other people living with CP or experts who you think could participate in our study.
