

WE WANT TO KNOW WHAT AAC-USERS THINK ABOUT MENTAL HEALTH

Do you use keyword sign, eye-gaze, PODD book, head nodding/shaking, or any other type of AAC?

Are you 10-24 years old, living in Australia?

Contact

Jacinta.Pennacchia
@mcri.edu.au

Or call/text
0405 784 520

You will do an interview with a speech pathologist and researcher named Jacinta.

You can do the interview on Zoom, email, text. If you live close to Melbourne, we can do it in-person.

We can take however long you need.

At the interview, you can choose to have someone there to help you, for example:

- your support person
- our researcher who uses AAC

THIS RESEARCH IS IMPORTANT BECAUSE

it will help us work out ways to better support the mental health of people with disability.
