

# Invitation to participate in speech therapy research

Children and their families are invited to participate in speech therapy research

## Dynamic Tactile Temporal Cuing (DTTC)

Children who

- ✓ have cerebral palsy.
- ✓ are 3-8 years.
- ✓ have moderate to severe speech difficulty.
- ✓ do not have a diagnosed intellectual disability.
- ✓ have normal or adjusted-to-normal hearing and vision.
- ✓ speak English.

are invited to attend DTTC speech therapy research at your local Cerebral Palsy Alliance site.

DTTC aims to improve your child's speech accuracy, intelligibility, and the ability to take part in conversations. Speech therapy is free and will go for 3 times a week for 6 weeks.

This research also aims to find out what parents/ carers and speech pathologists think about DTTC therapy. After completing the therapy block, you will be invited to fill out a questionnaire and attend an interview.
