

Planning and Cerebral Palsy

Do you have Cerebral Palsy (CP) and aged between 18 to 45 years old?

We are interested in how adults with CP use planning to solve problems and how planning is related to beliefs about one's decision.

We are seeking adults with CP (18 to 45 years old) who

- Have no other disability diagnoses not associated with CP
- Use English as fluent language
- Able to communicate through spoken language or communication aids
- Have normal or corrected vision and hearing
- Have access to the Internet, a laptop, or personal computer for access to Zoom and have a web camera and microphone

What's involved?

In this study you will complete one or two sessions online (via Zoom) or face-to-face. You will solve some reasoning puzzles and answer some questions about yourself. The entire study is expected to take around 1 to 2 hours.
