

Our Research Impact

CPA researchers in the **top 1%** of CP experts globally

Established **World CP Day** as a global community event

165 people with lived experience connected to research through **CP Quest**

Organised **11** global summits on topics such as stem cells, neonatal stroke and assistive technology

CPA therapists contributing to and implementing breakthroughs in research

Supporting improved healthcare outcomes for **First Nations** people

40% decline

in rate and decreased severity of CP in Australia

Average age of CP diagnosis reduced from 19 months to as young as **3 months**

Australia has one of the **lowest rates** of CP in the world

\$107m+

 invested in research and disability technology development including:

\$4.5m invested in low to middle income countries

\$7.1m invested in disability tech startups

Areas of Research Focus >> Pioneering World Firsts in Cerebral Palsy

EARLY DETECTION AND EARLY INTERVENTION

588+ babies supported in **3** early diagnosis clinics

Championed implementation of **General Movements Assessment** in all Australian NICUs

TECHNOLOGY

World first clinical guidelines for **eye-gaze tech** for CP

Establishing **My Voice Library** - capturing words through gamification

EPIDEMIOLOGY

Assisting establishing **14 CP registers** globally

Pioneering CMV research and prevention campaigns

REGENERATION

Supported Australia's first **compassionate cord blood infusion** for CP

Stem cell community group established
