

In Their Own Words

A new research opportunity for young people with intellectual disability

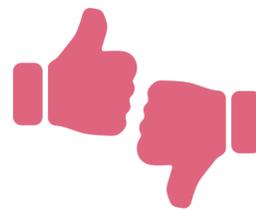

Are you a young person with intellectual disability?
Do you live in Australia? Are you between 12 and 28
years old?

We want to know:

What are your experiences with

- growing up
- making decisions
- being yourself
- living life your way
- standing up for yourself?

• What is it like to make big decisions as you grow up?
• How do rules and services help you or make things harder?

What does the study involve?

You can choose to

- an interview
- an interview with a photo activity

An interview will take about 1 hour. An interview with photos takes about 90 minutes.

You can bring a support person if you want.

Who do I contact?

Sierra Angelina Willow
UNSW student researcher
